

Greenhouse installed at Central Valley High School

By Lisa Fischer

GREELEY -- After 24 hours of monitoring progress a 9x18 greenhouse was installed at Central Valley High School.

The facility will be monitored by horticulture students Maya Dehart, Miranda Pribnow and Alyssa Dehart and overseen by their instructor Julia Wright. The greenhouse is located near CVHS's ag department and has a sensor system to regulate heating and cooling. At present, the greenhouse houses annual flowers growing in 1x2 trays and hanging baskets. Those in charge of the plants anticipate them being ready to sell to the public by mid-May. They also praised the school's administration for the assistance it provided in acquiring the grants needed to purchase the greenhouse.

CVHS students taking Horticulture: Maya Dehart, Miranda Pribnow and Alyssa Dehart stayed busy, Wed. April 11, maintaining the school's new Greenhouse during its first day in operation.
